

# Proposed Plan for Day 1 of Executive Seminar on Portfolio Construction

Raman Uppal

March 18, 2012

## Brief Outline

<b>1</b>	<b>Theory and Design of Static and Dynamic Portfolios</b>	<b>3</b>
1.1	Static/myopic portfolio choice and asset allocation; performance evaluation . . . . .	3
1.2	Portfolio optimization with respect to a benchmark . . . . .	3
1.3	Portfolio optimization with constraints, transactions costs, and taxes . . . . .	3
1.4	Dynamic/long-term portfolios . . . . .	3
1.5	Investing over the life-cycle . . . . .	3
<b>2</b>	<b>Effect of Estimation Error on Portfolio Performance</b>	<b>3</b>
2.1	Performance analysis and the historical record for active management . . . . .	3
2.2	Dangers of “naively optimized” portfolios . . . . .	3
2.3	Understanding the difficulty in estimating expected returns . . . . .	3
2.4	Understanding the difficulty in estimating covariances . . . . .	3
2.5	Understanding the good performance of the $1/N$ portfolio . . . . .	3
<b>3</b>	<b>Dealing with Estimation Error: Robust Portfolio Choice</b>	<b>3</b>
3.1	Bayesian approach to dealing with estimation error . . . . .	3
3.2	Mix of model-based and Bayesian approach . . . . .	4
3.3	Portfolio resampling . . . . .	4
3.4	Robust portfolio choice . . . . .	4
3.5	Norm constrained portfolios and how to balance $1/N$ with optimal portfolios . . . . .	4
<b>4</b>	<b>Dealing with Estimation Error in Expected Returns</b>	<b>4</b>
4.1	Parametric portfolio choice . . . . .	4
4.2	VAR models and portfolio choice . . . . .	4
4.3	Empirical properties of expected returns . . . . .	4

<b>5</b>	<b>Dealing with Estimation Error in Volatilities, Covariances, and Correlations</b>	<b>4</b>
5.1	Dynamic models of volatilities . . . . .	4
5.2	Nonlinear dependence between asset returns and tail risk . . . . .	4
5.3	Using information in option prices to improve forecast of expected returns . . . . .	4
5.4	Using information in option prices to improve forecast of volatilities and correlations	4
5.5	Factor models . . . . .	5
5.6	Minimum-variance models . . . . .	5
5.7	Bayesian approaches . . . . .	5
5.8	Dynamic models of correlations . . . . .	5
	<b>Books</b>	<b>6</b>
	<b>Survey Papers</b>	<b>6</b>
	<b>All References</b>	<b>7</b>
